

Terrasoft® Globe

Ø 750 mm

Ø 500 mm

Ø 400 mm

Ø 300 mm

The globe symbolizes mobility. No one can be offended by its shape. It serves as a design element - and at the same time as a seat. The Terrasoft globes made of pure rubber granulate in three high-quality colours look good on any surface. Used in groups, the globes give large areas an overall design edge by using them specifically as a design feature themselves. Gardens, outdoor areas or play areas can be upgraded easily, quickly and cheaply with Terrasoft. Because the globes are apart from being an extraordinary seating object also a hit as a balancing course! The elements are extremely stable and durable.

ADVANTAGES

- seating
- low maintenance
- robust
- extraordinary design feature
- Play element

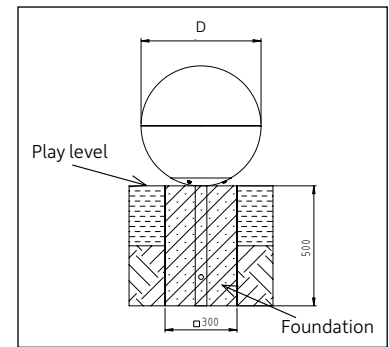

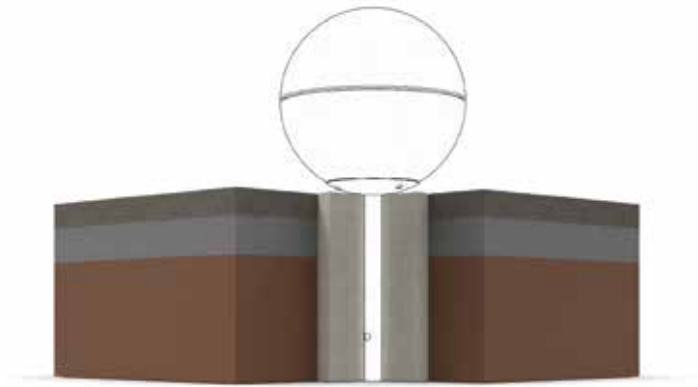

APPLICATION

Whether in gardens or urban areas - the globe is versatile and makes a good impression everywhere. Purposely used, it can be seating and balancing course at the same time. For a surcharge, the globe is also available with an EPDM surface coating.

 Terrasoft® Globe (L x W x H) Ø 300 mm | SBR rubber granulate | Item no.: 353330xx1

Globes embedded in concrete by means of the ground anchors.

INSTALLATION INSTRUCTIONS

Globes globe with Floor anchor:

The globes can be embedded with the ground anchor into the prepared concrete foundation to fix them permanently. The globe has to be on top of the floor. Take care that the ball is fully supported on a firm surface.

INSTALLATION INSTRUCTIONS

Select the play equipment location. Carry out excavation work for the foundation.

Set up the concrete foundation acc. to the dimensions indicated (belonging to diameter of the globe) with central, horizontal reinforcement (BST 500 S) in the quality class C 20/25. Put the floor anchor of the globe into the foundation. The globe has to lay on the play level. Take care that the foundation is a bit smaller than the diameter of the globe.

Do not allow children to use the equipment during the setting period of 8 – 10 days (depending on weather conditions and foundation size).
